Students must demonstrate competency in computer literacy by successful completion of a competency exam or through completion of a college-level computer science course (CIS 105). \_\_\_\_\_

**Note:** The anticipated major or area of interest will impact the type and number of fine arts classes that should be completed. Many majors in the arts have selective admission based on audition or portfolio; successful completion of the transfer associate degree does not guarantee admission to the desired baccalaureate.

The Louisiana Transfer Associate Degree consists of 39 hours of General Education (GenEd) and 21 hours of additional coursework. Students who enter a four-year public university with this degree will have met the institution’s general education requirements and will be granted upper division (junior) status. This guarantee applies to those who successfully complete the degree with the required grade of “C” or better in each course.

All BPCC students are expected to be familiar with College policies, requirements, procedures and regulations. Students must assume final responsibility for being acquainted with College policies. In no case will a regulation be waived or an exception be granted because a student pleads ignorance of the regulation.

Students pursuing associate degrees, academic certificates, or technical competency areas at BPCC must declare their intent to do so. Curricular requirements become effective at the date of the declaration of the academic major and do not date from the point of original enrollment in the College. If the student resigns or does not enroll for one semester, the student would have to meet the requirements of a new curriculum.

The student is responsible with all the requirements of the degree program and should consult with his/her academic advisor when necessary. Each student assumes the responsibility for scheduling courses which are applicable to degrees and for taking courses in proper sequence to ensure the orderly progression of work.
