

## Camtasia & Snagit

[Camtasia Studio](#) is a screen recorder program. With Camtasia you can record your video, edit it, and convert it to the needed format to present to your students.

[Snagit](#) is a screen capture program. With Snagit you can capture any screen shot and save it as a graphic. Use it in your online course, PowerPoint presentation, Word document, or email it to someone.

### Getting the Software:

To get the software on your BPCC computer, you must submit a "Request to Install Camtasia & Snagit" work request to Computer Services. BPCC has purchased a set amount of licenses. However, this software license does not include additional instructor copies at home.

### Instructional Information:

BPCC offers training through the Department of Educational Technology. ([Click here for a training schedule](#)) The hands-on training is broken into 2 parts. Each training is 2 hour in length and covers the following topics:

- **Part I – Basic:** In this session, you will be introduced to the basic functions required to produce a Camtasia Studio project.
- **Part II – Advanced:** You will learn how to add narration to your project and edit audio. You will also learn how to insert "Call Outs" (closed captioning) to the video project.
