

Course Availability

The Course Availability page controls access to the course.

Note: When courses are built within the BPCCC Blackboard system, by default they are made **unavailable!** The instructor must make the course available before the students can access the course.

To make the course available:

1. Select Yes
2. Click on Submit

A screenshot of the Blackboard 'Set Availability' dialog box. The dialog box has a title bar that says '1 Set Availability'. Below the title bar, there is a question: 'Make this course available to users?'. Underneath the question, there is a label 'Make Course Available:' followed by two radio buttons. The first radio button is selected and is labeled 'Yes'. The second radio button is unselected and is labeled 'No'. The dialog box is overlaid on a blurred background of the Blackboard interface.

1 Set Availability
Make this course available to users?
Make Course Available: <input checked="" type="radio"/> Yes <input type="radio"/> No

The course will now be available to students.

Note: If the students cannot see the course after making the course available, check to make sure the setting on the Course Duration (Control Panel/Course Options/Settings/Course Duration) are not limiting the availability of the course.
