

Preamble

Compliance with Standards (describe how each program and option complies with, or fails to comply with each standard - the final line shall indicate whether the program or option is in non-compliance, partial compliance, or compliance)

PA.1 Preparation of Self-Study Report

The Self-Study Report shall follow the guidelines and be completed by a representative portion of the institutions administrative staff, teaching faculty, and students.

2011 ATMAE Team: Mr. Steve Brown, Mr. David Brinkruff & Mr. Stephen Dunn

With the exception of the AAS Networking Specialist program, it appears that faculty input was limited to providing course books and course data but they did not participate in the preparation or review of the narrative responses.

PA.2 Program Definition

A program is a set of courses leading to a degree. A program may have more than one option, specialization or concentration, but specific course requirements for each option shall be clearly specified, and as appropriate all program/options shall meet ATMAE standards. In situations where an option is not appropriate for ATMAE accreditation based upon the approved definition of technology, management, and applied engineering, the request for accreditation should clearly state which option, concentration, or specialization is seeking accreditation and which ones are excluded. The case for exclusion should be made with the application for accreditation. If an option, concentration or specialization is excluded and the program becomes accredited, the program must identify specifically which concentrations, options and specializations are and are not accredited in all their publications and promotional materials that mention accreditation.
