

Welcome

On November 29-30, 2009, the division of Cyber Information Technology hired an ATMAE Consultant, Mark Durivage, to review our programs before we pursue accreditation. An analysis of information obtained in material review and personnel interviews led the consultant to determine that Bossier Community College is in a positive position to pursue ATMAE accreditation using the Outcomes Assessment Model during the Spring 2011 accreditation cycle. The consultant completed a letter, which was submitted to the Louisiana Board of Regents, to confirm the recommended date of accreditation.

During Mark Durivage's visit, it was brought to the consultant's attention that there were five additional Associate of Applied Science degree programs that may also be in a position to pursue accreditation. Based upon his interviews with the academic deans responsible for the programs, the consultant determined that Bossier Community College should pursue ATMAE accreditation using the Outcomes Assessment Model during the Spring 2012 accreditation cycle.

This document address concerns and finding from both rounds of reviews. Please use this document as an addendum to the reports. You will find a brief intro of the topic for each section, followed by the findings of each visiting team and our response to the findings.

In order to help visually see the difference between the two visits we have colored coded the sections. You will see **green** to represent information from the first round and **blue** to represent information from the second round.

The first round of accreditation involved the following programs as part of the self-study:

Programs under Division of Cyber Information Technology:

- Associate of Applied Science in Computer Information Systems
- Associate of Applied Science in Information Network Security Specialist
- Associate of Applied Science in Network Specialist
- Associate of Applied Science in Information Programmer Analyst
- Associate of Applied Science in Information Systems Administration Specialist
- Associate of Applied Science in Web Analyst Programmer

The second round of accreditation involved the following programs as part of the self-study:

Programs under Division of Cyber Information Technology:

- Associate of Applied Science in Information Systems Administration Specialist

Programs under Division of Mathematics and Technical Education:

- Associate of Applied Science in Oil and Gas Production Technology
- Associate of Applied Science in Construction Technology and Management
